Shear Viscosity $\eta(\dot{\gamma})$ [Pa · s]
Shear Rate $\dot{\gamma}$ [s^{-1}]
Oldroyd-B ($\alpha = 0$): Constant μ_0
Giesekus ($\alpha = 0.3$): Shear Thinning (Exact)
Planar Extensional Viscosity η_E [Pa · s]
Extension Rate E [s^{-1}]
Oldroyd-B: Divergence at E_{crit}
Giesekus ($\alpha = 0.3$): Bounded Plateau (Exact)
Critical Strain $E_{crit} = \frac{1}{2\lambda}$
